

Automotive Integrity is our duty here at Turk Automotive and customer satisfaction is #1 Automotive reliability and quality service comes standard. We can't say enough how grateful we are to be chosen and trusted by our customers to assist with their vehicle needs. To show our appreciation we now offer a customer appreciation program for all that allow us to be their full-service provider. This program includes a variety of benefits to help you save on vehicle maintenance, costly repairs, and to keep you informed of your vehicles condition to ensure that you get the most out of it.

### **WHAT DOES THE CUSTOMER APPRECIATION PROGRAM OFFER?**

**Complimentary Multi-Point Inspections:** We offer complimentary inspections on all vehicle makes and models to keep our customers informed of any concerns that might require immediate attention and to keep you on the road to reliability by giving you advice and providing options for any needed repairs or maintenance related service that could prevent any costly repair in the future. While performing these inspections we have found that majority of our customers seem to have a lot of vehicle concerns, a lot of which are safety related concerns, and about 90% of them are not aware that there is anything wrong with their vehicle.

**Referral Program:** We offer these inspections Because we care about the safety of not only our customers and their families but also the safety of everyone around them on the road. Another reason is to ensure that all maintenance and repairs are current with the OE Manufacturers recommended Service Intervals. In our efforts to help make the roads a safer place for everyone we have put in place a referral program in hopes that our customers will tell their friends and family that we offer complimentary inspections and they too will allow us to help keep them in the drivers seat of their ride!

**If you would like to hear more about our referral program or discover more ways in which we put our customers first, please feel free to Give us a Call or Stop by today to meet with our team! We look forward to seeing you soon!**
